

Information about the exotic seeds

The seeds we are offering have Mediterranean, subtropical or tropical origin. Our suppliers are collecting seeds all around the World, directly from their country of origin.

In order to be able to offer you fresh seeds, we support each species only limited amount of seeds. Therefore, sometimes the seeds of special species are temporarily unavailable.

If proper storage of seeds, which vary from species to species, is not followed, the seeds may quickly lose viability, so it is recommended to sow seeds as soon as you get them or latest within 6 weeks.

Before selling the seeds we are always, as a rule, testing them in the laboratory. But nevertheless the optimal germination in artificial conditions can not be achieved. Proposed exotic plants, is not as ordinary mass product, but the true natural rarity that require a lot of patience! Don't destroy too early the sowing, since the time of germination depends on many factors. Each crop needs specific approach, but we can't provide you with the instruction for all of the seeds, so please inform yourself in advance.

All exotic seeds are designed to grow as ornamental or houseplants. Their seeds or fruits or the plant itself is uneatable.

Exotic seeds are excluded from right to claim or return.
